About Me

I possess a strong passion for the development of web applications and the satisfaction that comes with witnessing their successful deployment. My inclination towards software engineering has been fostered by my father, who is an accomplished full stack engineer. Witnessing the innovative projects he created during my formative years instilled in me an unwavering interest in pursuing a similar career path.

Work Experience

Dec 2022 - Present

Software Developer | Youngstown State University

- As a skilled professional, I have been responsible for addressing incoming tickets pertaining to the modification of the Youngstown State University website, utilizing the Drupal platform.
- In this capacity, I have utilized cutting-edge technologies including HTML5, CSS3, and JavaScript to execute modifications to the website as per the requests received.
- These requests have entailed an array of updates such as adding or updating files, hyperlinks, information, and staff lists.
- Moreover, I have demonstrated the ability to create new web pages within the Youngstown State University website, using my proficiency in the aforementioned technologies to ensure optimal outcomes.

May 2022 - Dec 2022

Advanced Repair Agent | Geek Squad

- In my capacity as a technical support professional with Geek Squad, I have consistently provided direct assistance to clients, utilizing a range of sophisticated troubleshooting techniques such as operating system repair, virus removal, and simple registry fixes. I have consistently delivered exceptional results in terms of resolving technical issues and restoring clients' devices to their optimal functionality.
- In addition to my broad-based technical support skills, I am also certified by Apple to diagnose and repair Apple devices such as the latest iPhones, Apple Watches, iPads, and Mac computers. This certification has enabled me to deliver reliable and efficient service, with a focus on high-quality repairs and support.
- I have demonstrated my exceptional teaching skills, working with clients who are seeking to learn how to use a computer effectively. Additionally, I have effectively managed the backup, security, and destruction of confidential customer data based on the specific service requested, demonstrating my ability to manage sensitive information in a responsible and ethical manner.
- my familiarity with computer BIOS, command line tools, and the Windows registry has allowed me to effectively troubleshoot and improve clients' devices, leading to enhanced performance and user experience.

Skills

- Javascript, HTML5, CSS3, C++, Python, Java
- React.js, Angular, Django, Maven
- Node.js, Express, MongoDB

Feb 2022 – May 2022 **Sales Associate | Best Buy**

- As a seasoned sales professional, I have leveraged my extensive product knowledge to assist customers in making well-informed purchasing decisions. I have consistently maintained a deep understanding of the latest technologies that are introduced to the consumer world, ensuring that my customers receive comprehensive advice and guidance on the most suitable products for their needs.
- I have consistently demonstrated my motivation to stay abreast of the latest trends and innovations in the industry, enabling me to remain a trusted and credible source of information for my customers.
- I have played an instrumental role in enhancing the front-end flow of the store, ensuring that customers have a seamless and satisfying experience. By consistently providing exceptional service, I have ensured that customers leave the store feeling confident and happy with their new product, leading to enhanced customer satisfaction and loyalty.

May 2021 – Feb 2022 **Product Flow Specialist | Best Buy**

- I was a key contributor to a complex logistics, commerce, and shuttling system, utilizing my expertise to ensure the efficient flow of products and services. Specifically, I was responsible for managing the receipt of shipments from trucks from the DDC, ensuring that the store was always adequately stocked with inventory.
- I played an instrumental role in handling shipping for customer orders, as well as allocating products for curbside and store pickup. By consistently providing prompt and efficient service, I helped to ensure that customer orders were fulfilled in a timely and accurate manner.
- In the course of my duties, I have gained an extensive understanding of how the back-end of a store affects the front-end, allowing me to effectively manage the interplay between inventory management, logistics, and customer service. This has enabled me to contribute to the overall success of the store, ensuring that it operates in an efficient and customer-centric manner.

Education

Aug 2021 – Present **Bachelor of Science in Computer Science**

I am an honors student with a 3.65 GPA. I am also currently minoring in Mathematics
